🚀 Amazon Sellers Network - Upload Instructions

Quick Upload Method (Recommended)

Step 1: Download All Files

1. Download the `github-upload.zip` file from `/home/ubuntu/`
2. Extract it on your local computer

Step 2: Upload to GitHub

1. Go to your repository: https://github.com/deviljd69/JDNano
2. Click **"Add file" → "Upload files"**
3. Drag and drop ALL extracted files and folders
4. Write commit message: "Add Amazon Sellers Network landing page"
5. Click **"Commit changes"**

What You're Uploading:

✅ **Next.js Application Files:**
- `app/` - Main application pages
- `components/` - React components with animated popups
- `lib/` - Utility functions
- `data/` - Content and configuration
- `package.json` - Dependencies
- Configuration files (tailwind, typescript, etc.)

✅ **Key Features:**
- Animated popup system (no more alerts!)
- Responsive design
- Modern landing page
- All styling and components

After Upload - Deploy on Vercel:

1. Go to https://vercel.com
2. Connect your GitHub account
3. Import `JDNano` repository
4. Click Deploy
5. Your site will be live at `jdnano.vercel.app` or similar

File Structure:

```
JDNano/
├── app/
│   ├── page.tsx          # Main landing page
│   ├── layout.tsx        # App layout
│   └── globals.css       # Global styles
├── components/
│   ├── ui/               # UI components
│   └── *.tsx             # Custom components
├── package.json          # Dependencies
└── [other config files]
```

That's it! Your Amazon Sellers Network will be live on GitHub and deployable on Vercel! 🎉
